2. Place one tiger-eye oval bead inside of one wrapper. Hold the stone in the middle of wrapper using your thumb and your index finger. Wrap a piece of hematite wire starting from one of the notches of the edge or wrapper. Wrap it across and around the wrappers using the notches until bead is secure in place. Trim excess wire. Wrap three more beads on the same fashion and set aside.

3. Open a 6mm jump ring, scoop up one curved wrapper attaching it through its loop. Close jump ring. Make six more of those dangles and set aside.
